

# Notification of Ecological Monitoring of Birds Exceedance

## Incident Report on Action/ Limit Level Exceedance

Reference No.:	IR20230116_Species Diversity				
Project:	Contract No. SPW 07/2020 Environmental Team for Construction of Yuen Long Effluent Polishing Plant Stage 1				
Survey Dates:	2023/01/16 (daytime)				
Action level / Limit level: (For Avifauna Communities)	Method	Parameters	Action Level	Limit Level	
	Transect	Abundance of all avifauna species (including but not limited to overwintering waterbirds) in the community	Significant decline <sup>1,2</sup> in any of these parameters during the current monitoring month relative to the corresponding month during the baseline survey	Significant decline in any of these parameters for three consecutive months	
		Species diversity of all avifauna species (including but not limited to overwintering waterbirds) in the community			
		Abundance of species with conservation importance only			
		Species diversity of species with conservation importance only			
	Point Count	Abundance of all avifauna species (including but not limited to overwintering waterbirds) in the community			
		Species diversity of all avifauna species (including but not limited to overwintering waterbirds) in the community			
		Abundance of species with conservation importance only			
		Species diversity of species with conservation importance only			
Measured significant decline in abundance and/or species diversity (fill in as appropriate)	Transect	Abundance of all avifauna species (including but not limited to overwintering waterbirds) in the community	<input type="checkbox"/>	<input type="checkbox"/>	
		Species diversity of all avifauna species (including but not limited to overwintering waterbirds) in the community	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
		Abundance of species with conservation importance only	<input type="checkbox"/>	<input type="checkbox"/>	
		Species diversity of species with conservation importance only	<input type="checkbox"/>	<input type="checkbox"/>	
	Point Count	Abundance of all avifauna species (including but not limited to overwintering waterbirds) in the community	<input type="checkbox"/>	<input type="checkbox"/>	
		Species diversity of all avifauna species (including but not limited to overwintering waterbirds) in the community	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
		Abundance of species with conservation importance only	<input type="checkbox"/>	<input type="checkbox"/>	
		Species diversity of species with conservation importance only	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
		Action taken / to be taken <sup>3</sup> : (tick / circle / fill in as appropriate)	Responses: <input checked="" type="checkbox"/> Informed IEC, ER, and Contractor. <input checked="" type="checkbox"/> Reviewed monitoring data. <input checked="" type="checkbox"/> Investigated possible causes of decline and identified possible source (s) of impact. Recorded in notification. <input checked="" type="checkbox"/> Check plant, equipment, and Contractor's working methods.		

	<input type="checkbox"/> Other
Possible reason/s <sup>4</sup> for action or limit level Non-compliance: (tick / fill in as appropriate)	<p><b>Findings / Evidence</b></p> <p><input type="checkbox"/> Construction noise disturbance  <input type="checkbox"/> Vibration disturbance from potential percussive piling works  <input type="checkbox"/> Construction lighting/glare disturbance  <input type="checkbox"/> Increased human activities  <input type="checkbox"/> Construction dust disturbance  <input checked="" type="checkbox"/> Others: The lower diversity during this period with respect to the baseline data could be due to the current dominance of the Great Cormorants in the community. The current dominance of this species was due to its concurrent migratory season. This dominant species could have decreased the performance of co-occurring species (Gilbert et al. 2009)<sup>5</sup> and forced them to utilize other areas outside the survey area, thus, made the area less diverse. Furthermore, low diversity index usually results from high dominance in the community as these are inversely related (Shaukat et al., 1978)<sup>6</sup>. Species diversity of species with conservation importance only for point count method has reached the limit level. However, as the exceedances were not project related, not all additional actions need to be taken.</p>
Observations	<input checked="" type="checkbox"/> Noise levels during the daytime survey (47.4 to 61.2 dB(A)) recorded from the different point count locations during the ecological bird monitoring are low. These low noise levels are unlikely to cause significant impact to birds as behavioral response of some kind are more likely to occur at above 65.5 dBA only (Wright et al. 2010) <sup>6</sup> . <input checked="" type="checkbox"/> Environmental site audits indicated that the recommended environmental protection measures/mitigation measures to mitigate ecological impacts have been implemented. <input checked="" type="checkbox"/> Significant decrease in species diversity of all avifauna species (including but not limited to overwintering waterbirds) in the community was observed for <u>Transect/Point Count</u> survey. <input checked="" type="checkbox"/> Significant decrease in species diversity of species with conservation importance only was observed for <u>Transect/Point Count</u> survey. <input checked="" type="checkbox"/> Significant increase in species diversity of species with conservation importance only was observed for <u>Transect/Point Count</u> survey.
Conclusion	<input checked="" type="checkbox"/> Due to influences of external factors/ other threats, not Project related <input type="checkbox"/> Due to influences of construction activities under this project in the vicinity, considered to be Project related
Mitigation measures	<input checked="" type="checkbox"/> Avoidance of recognized site of conservation importance <input checked="" type="checkbox"/> Restriction of construction hours <input checked="" type="checkbox"/> Minimizing construction noise disturbance impacts through the use of noise barriers <input checked="" type="checkbox"/> Establishment of bird curtain
